Description: R-Phycoerythrin-labeled recombinant human Anti-OX40 antibody recognizing the OX40 binding region. This antibody has not been tested for cross-reactivity with any other species.

Assay Conditions: For flow cytometry, we recommend incubating cells on ice in the dark for 20 minutes with 20 µg/ml cells of RPE anti-OX40 antibody.

Purification: Protein A affinity chromatography from HEK293 supernatants.

Application: Useful for labeling cells expressing OX40 for flow cytometry and immunofluorescence microscopy.

Control Jurkat cells and OX40-expressing stable Jurkat cells were treated with human PE anti-OX40 antibody.
