Product Information

Description:	NKCellIM™ (NK cell medium) is optimized for culturing NK cells.
Formulation:	Contains RPMI-1640, Heat-Inactivated FBS (HiFBS), 1% Penicillin/Streptomycin plus other components.
Quality:	Sterile filtered (0.2 µm) and Mycoplasma-free. All components are low endotoxin. FBS is ISIA-certified and sourced from the United States of America.
Storage:	Upon receipt, the medium should be stored in the dark at 4°C.
Stability:	Do not exceed 37°C. When stored in the dark at 4°C, the product is stable for six months after first thaw. Avoid repeated freeze/thaw cycles. For detailed thawing and cell culture protocol, see cell line data sheet.

Directions for Use:

1. Thaw NKCellIM™ at room temperature (15-25°C) or overnight at 4°C. Mix thoroughly.
NOTE: If not used immediately, store at 2-8°C for up to 1 month. Alternatively, aliquot into tubes and store at -20°C. After thawing aliquots, do not re-freeze.
2. Add desired cytokines, growth factors, and other components to NKCellIM™. Mix thoroughly. Set up cultures as desired.
