SZABO-SCANDIC HandelsgmbH

Quellenstraße 110, A-1100 Wien T. +43(0)1 489 3961-0 F. +43(0)1 489 3961-7 <u>mail@szabo-scandic.com</u> www.szabo-scandic.com

PRODUCT INFORMATION

OMDM-1

Item No. 10171

CAS Registry No.:	616884-62-9	<u>с</u> ОН
Formal Name:	(S)-N-(1-(4-hydroxyphenyl)-2-	
	hydroxyethyl)oleamide	
Synonym:	(S)-N-oleoyl Tyrosinol	
MF:	C ₂₇ H ₄₅ NO ₃	0
FW:	431.7	
Purity:	≥98%	
Stability:	≥2 years at -20°C	
Supplied as:	A crystalline solid	$\setminus - \land \land \land$
UV/Vis.:	λ_{max} : 225, 279 nm	

Laboratory Procedures

For long term storage, we suggest that OMDM-1 be stored as supplied at -20°C. It should be stable for at least two years.

OMDM-1 is supplied as a crystalline solid. A stock solution may be made by dissolving the OMDM-1 in an organic solvent purged with an inert gas. OMDM-1 is soluble in organic solvents such as ethanol, DMSO, and dimethyl formamide. The solubility of OMDM-1 in these solvents is approximately 30 mg/ml.

OMDM-1 is sparingly soluble in aqueous buffers. For maximum solubility in aqueous buffers, OMDM-1 should first be dissolved in ethanol and then diluted with the aqueous buffer of choice. OMDM-1 has a solubility of approximately 0.5 mg/ml in a 1:1 solution of ethanol:PBS (pH 7.2) using this method. We do not recommend storing the aqueous solution for more than one day.

Description

Numerous analogs of arachidonoyl ethanolamide¹ (AEA, anandamide; Item No. 90050) potentiate its biological activity. This potentiation is ascribed either to inhibition of AEA reuptake into neurons or inhibition of fatty acid amide hydrolase (FAAH) within the neurons.² OMDM-1 is an endocannabinoid analog specifically designed to be a potent and selective inhibitor of the cellular uptake of AEA.³ It is a weak inhibitor of FAAH activity in rat brain homogenate and exhibits moderate inhibitory effects upon AEA uptake in C6 glioma and RBL-2H3 cells.⁴ Structurally, OMDM-1 is the amide of (R)-tyrosinol with oleic acid (Item No. 90260). In RBL-2H3 cells, OMDM-1 inhibits the cellular uptake of tritiated AEA with an IC₅₀ of 2.4 μ M, with negligible effects on the CB₁ receptor and VR₁.³
