# PRODUCT INFORMATION

## PAD1 (human, recombinant)

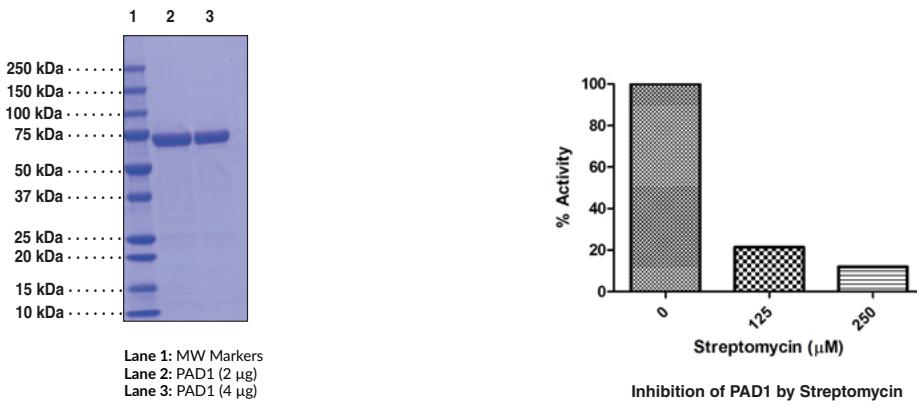

Item No. 10784

### Overview and Properties

<b>Synonyms:</b>	PADI1, PDI1, Peptidylarginine Deiminase 1, Protein Arginine Deiminase 1
<b>Source:</b>	Recombinant N-terminal His-tagged protein expressed in <i>E. coli</i>
<b>Uniprot No.:</b>	Q9ULC6
<b>Amino Acids:</b>	2-663 (full length)
<b>Molecular Weight:</b>	76.4 kDa
<b>Storage:</b>	-80°C (as supplied); avoid freeze/thaw cycles by aliquoting protein
<b>Stability:</b>	≥2 years
<b>Purity:</b>	≥95% estimated by SDS-PAGE
<b>Supplied in:</b>	50 mM Tris-HCl, pH 8.0, with 150 mM sodium chloride, 1 mM DTT, and 20% glycerol
<b>Protein</b>	
<b>Concentration:</b>	<i>batch specific</i> mg/ml
<b>Activity:</b>	<i>batch specific</i> U/ml
<b>Specific Activity:</b>	<i>batch specific</i> U/mg
<b>Unit Definition:</b>	One unit is defined as the amount of enzyme required to produce 1 nmol of NH <sub>4</sub> <sup>+</sup> per minute at 37°C in 50 mM HEPES, pH 7.7, containing 10 mM calcium chloride, 5 mM DTT, and 2 mM N-Benzoyl-L-Arginine Ethyl Ester (BAEE).

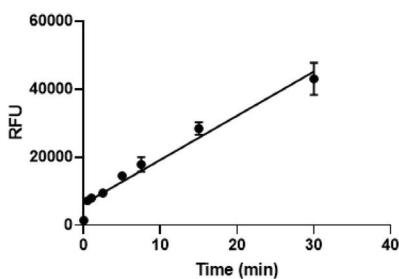

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Lane 2: PAD1 (2 µg)  
Lane 3: PAD1 (4 µg)

Representative gel image shown; actual purity may vary between each batch.

**Activity of PAD1.** PAD1 activity was determined using Cayman's PAD1 Inhibitor Screening Assay Kit (Item No. 701450) with 2.6 µg PAD1 and 2 mM BAEE substrate.

**WARNING**  
**THIS PRODUCT IS FOR RESEARCH ONLY - NOT FOR HUMAN OR VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.**

#### SAFETY DATA

This material should be considered hazardous until further information becomes available. Do not ingest, inhale, get in eyes, on skin, or on clothing. Wash thoroughly after handling. Before use, the user must review the complete Safety Data Sheet, which has been sent via email to your institution.

#### WARRANTY AND LIMITATION OF REMEDY

Buyer agrees to purchase the material subject to Cayman's Terms and Conditions. Complete Terms and Conditions including Warranty and Limitation of Liability information can be found on our website.

# PRODUCT INFORMATION

## Description

---

Protein Arginine Deiminases (PADs) are guanidino-modifying enzymes belonging to the amidotransferase superfamily and are designated PAD1-4 and PAD6. PADs are calcium-dependent enzymes that catalyze the post-translational modification of target proteins by converting arginine to citrulline.<sup>1,2</sup> The various PADs exhibit tissue specific expression and different subcellular localization.<sup>3</sup> PAD1 is expressed in uterus and throughout the epidermis. PAD1 and PAD3 are speculated to mediate deimination of epidermal filaggrin (filament aggregation protein) and keratins, proteins involved in maintaining skin hydration.<sup>4</sup>
