PRODUCT INFORMATION

PAF Receptor (human) Monoclonal Antibody (11A4, Clone 21)

Item No. 160600

Overview and Properties

Contents:	This vial contains 100 µg of protein A-purified monoclonal antibody.
Synonym:	Platelet-activating Factor Receptor
Immunogen:	Synthetic peptide from the internal region of human PAF receptor
Species Reactivity:	(+) Human, bovine, and porcine; other species not tested
Uniprot No.:	P25105
Form:	Lyophilized
Storage:	-20°C (as supplied)
Stability:	≥3 years
Storage Buffer:	TBS, pH 7.4, when reconstituted in 500 µl of deionized water
Clone:	11A4, Clone 21
Host:	Mouse
Isotype:	IgG2a
Applications:	ELISA, Flow Cytometry (FC), and Immunocytochemistry (ICC); the recommended starting dilution for all applications is 1:1,000. Not recommended for Western blot. Other applications were not tested, therefore optimal working concentration/dilution should be determined empirically.

Image

5000 THP-1 cells per sample

Black: IgG-FITC control

Blue: Secondary Antibody Alone (1:2000)

Red: 160600 (2µg), then second Ab (1:2000)

WARNING
THIS PRODUCT IS FOR RESEARCH ONLY - NOT FOR HUMAN OR VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.

SAFETY DATA
This material should be considered hazardous until further information becomes available. Do not ingest, inhale, get in eyes, on skin, or on clothing. Wash thoroughly after handling. Before use, the user must review the [complete](#) Safety Data Sheet, which has been sent via email to your institution.

WARRANTY AND LIMITATION OF REMEDY
Buyer agrees to purchase the material subject to Cayman's Terms and Conditions. Complete Terms and Conditions including Warranty and Limitation of Liability information can be found on our website.

PRODUCT INFORMATION

Description

PAF is a potent phospholipid mediator which exerts diverse biological actions by interaction with a G protein-coupled PAF receptor. The PAF receptor has been cloned from a number of species including human, rat, and guinea pig and is characterized as a 7-transmembrane receptor which induces phosphoinositol turnover through G-protein coupling.¹⁻⁵ Northern blot analysis reveals that the receptor is expressed in leukocytes, placenta, lung, spleen, small intestine, kidney, liver, and brain.^{3,4} In leukocyte cell populations the receptor is found on platelets, monocytes, neutrophils, and B-cells, whereas resting T-cells and natural killer cell lines do not express the PAF receptor.⁶ Human monocytes treated with INF- γ have a 2-6 fold increase in PAF receptor expression compared to untreated cells.⁷
