Description

UR-144 (Item No. 11502) is a potent synthetic cannabinoid (CB) which preferentially binds the peripheral cannabinoid (CB₂) receptor (K_i = 1.8 nM) over the central cannabinoid (CB₁) receptor (K_i = 150 nM).¹ M-144 differs from UR-144 by having a fluorine atom on the terminal carbon of the alkyl group as well as a methyl group attached to the C₂ carbon of the indole. The biological activities of this compound have not been characterized. This product is intended for forensic and research applications.
