Laboratory Procedures

Rubratoxin A is supplied as a powder. A stock solution may be made by dissolving the rubratoxin A in the solvent of choice. Rubratoxin A is soluble in organic solvents such as methanol, ethanol, and DMSO, which should be purged with an inert gas.

Description

Rubratoxin A is a natural mycotoxin and competitive inhibitor of protein phosphatase 2A (PP2A; IC₅₀ = 170 nM).¹ It has no significant effect on several other phosphatases, including PP1, PP2B, and protein tyrosine phosphatase 1B. Rubratoxin A drives overphosphorylation of PP2A substrate proteins in cultured cells treated for three hours at 20 μM.¹ It causes suppression of tumor metastasis and reduction of primary tumor volume in mouse xenografts.¹
