PRODUCT INFORMATION

Finafloxacin (hydrochloride)

Item No. 22410

CAS Registry No.: 209342-41-6

Formal Name: 8-cyano-1-cyclopropyl-6-fluoro-7-
[(4aS,7aS)-hexahydropyrrolo[3,4-b]-
1,4-oxazin-6(2H)-yl]-1,4-dihydro-
4-oxo-3-quinolinecarboxylic acid,
monohydrochloride

Synonym: BAY35-337

MF: $C_{20}H_{19}FN_4O_4 \cdot HCl$

Purity: $\geq 98\%$

FW: 434.9

UV/Vis.: λ_{max} : 245, 286, 371 nm

Supplied as: A solid

Storage: $-20^{\circ}C$

Stability: ≥ 4 years

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Laboratory Procedures

Finafloxacin (hydrochloride) is supplied as a solid. A stock solution may be made by dissolving the finafloxacin (hydrochloride) in the solvent of choice, which should be purged with an inert gas. Finafloxacin (hydrochloride) is soluble in DMSO.

Description

Finafloxacin is a fluoroquinolone antibiotic.¹ It is active against *S. pneumoniae* and *P. aeruginosa*, as well as methicillin-resistant *S. aureus* (MRSA) that is sensitive or resistant to fluoroquinolones ($MIC_{90}S = 2, 2, 0.125$, and 4 mg/L , respectively). Finafloxacin (23.1 mg/kg) improves survival in *F. tularensis*- or *Y. pestis*-infected mice in models of tularemia or plague, respectively.² Formulations containing finafloxacin have been used in the treatment of acute otitis externa.
