PRODUCT INFORMATION

LPS from *Salmonella minnesota* R595 (Re)

Item No. 23608

Overview and Properties

Contents: Each vial contains 1 mg of LPS isolated from *Salmonella minnesota* R595 (Re), which was in water when lyophilized

Storage: 4°C (as supplied)

Stability: ≥2 years

Special Conditions: This product is pyrogenic. Avoid accidental autoinoculation by exercising extreme care when handling in conjunction with any injection device.

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Description

LPS from *Salmonella minnesota* R595 (Re) is a rough mutant strain form of lipopolysaccharide (LPS) extracted from *S. minnesota* R595 (Re). LPS is commonly used to activate toll-like receptor 4 (TLR4) on leukocytes, eliciting inflammatory signaling in isolated cells and *in vivo*.¹⁻⁴
