# PRODUCT INFORMATION

## Thiothixene

Item No. 23649

**CAS Registry No.:** 5591-45-7  
**Formal Name:** N,N-dimethyl-9-[3-(4-methyl-1-piperazinyl)propylidene]-9H-thioxanthene-2-sulfonamide  
**Synonyms:** CP 12,252-1, NSC 108165, P 4657B, *cis*-Thiothixene  
**MF:** C<sub>23</sub>H<sub>29</sub>N<sub>3</sub>O<sub>2</sub>S<sub>2</sub>  
**FW:** 443.6  
**Purity:** ≥98%  
**UV/Vis.:** λ<sub>max</sub>: 230, 307 nm  
**Supplied as:** A crystalline solid  
**Storage:** -20°C  
**Stability:** ≥4 years

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

### Laboratory Procedures

Thiothixene is supplied as a crystalline solid. A stock solution may be made by dissolving the thiothixene in the solvent of choice, which should be purged with an inert gas. Thiothixene is soluble in organic solvents such as DMSO and dimethyl formamide. The solubility of thiothixene in these solvents is approximately 0.2 and 0.5 mg/ml, respectively.

### Description

Thiothixene is a typical antipsychotic.<sup>1</sup> It selectively binds to dopamine D<sub>2</sub> over D<sub>1</sub>, D<sub>3</sub>, and D<sub>4</sub> receptors (K<sub>s</sub> = 0.417, 338, 186.2, and 363.1 nM, respectively). Thiothixene also binds to various serotonin (5-HT), histamine H<sub>1</sub>, α<sub>1</sub>- and α<sub>2</sub>-adrenergic, muscarinic acetylcholine, and sigma receptors (K<sub>s</sub> = 15-5,754 nM) as well as the dopamine, norepinephrine, and serotonin transporters (K<sub>s</sub> = 3.16-30 μM). *In vivo*, thiothixene reduces spontaneous and amphetamine-induced locomotor activity in rats.<sup>2</sup> It enhances latent inhibition, as measured by a decreased lick latency in response to light and foot shock stimuli, which is a measure of selective attention in rats.<sup>3</sup> Thiothixene also increases competitive behavior in submissive mice, indicating antidepressant-like behavior.<sup>4</sup> Formulations containing thiothixene have been used in the treatment of schizophrenia and bipolar mania.
