PRODUCT INFORMATION

Methyclothiazide

Item No. 23799

CAS Registry No.: 135-07-9

Formal Name: 6-chloro-3-(chloromethyl)-3,4-dihydro-2-methyl-2H-1,2,4-benzothiadiazine-7-sulfonamide, 1,1-dioxide

Synonym: NSC 110431

MF: $C_9H_{11}Cl_2N_3O_4S_2$

FW: 360.2

Purity: $\geq 98\%$

Supplied as: A solid

Storage: $-20^{\circ}C$

Stability: ≥ 4 years

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Laboratory Procedures

Methyclothiazide is supplied as a solid. A stock solution may be made by dissolving the methyclothiazide in the solvent of choice, which should be purged with an inert gas. Methyclothiazide is slightly soluble in organic solvents such as DMSO and methanol.

Description

Methyclothiazide is a thiazide diuretic.¹ It inhibits norepinephrine- (Item No. 16673) and vasopressin-induced contractions of aortic rings isolated from spontaneously hypertensive rats at a concentration of 100 μM . Methyclothiazide reduces salt-induced increases in blood pressure in salt-sensitive but not salt-resistant rats without affecting body weight or heart rate.² Formulations containing methyclothiazide have been used to treat hypertension.

WARNING

THIS PRODUCT IS FOR RESEARCH ONLY - NOT FOR HUMAN OR VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.

SAFETY DATA

This material should be considered hazardous until further information becomes available. Do not ingest, inhale, get in eyes, on skin, or on clothing. Wash thoroughly after handling. Before use, the user must review the [complete](#) Safety Data Sheet, which has been sent via email to your institution.

WARRANTY AND LIMITATION OF REMEDY

Buyer agrees to purchase the material subject to Cayman's Terms and Conditions. Complete Terms and Conditions including Warranty and Limitation of Liability information can be found on our website.
