PRODUCT INFORMATION

Artemisinin-d₃ Item No. 25359

CAS Registry No.: 176652-07-6
Formal Name: [3R-(3 α ,5 α β ,6 β ,8 α β ,9 α ,12 β ,12 α R*)]-octahydro-3,6-dimethyl-9-(methyl-d₃)-3,12-epoxy-12H-pyrano[4,3-j]-1,2-benzodioxepin-10(3H)-one
MF: C₁₅H₁₉D₃O₅
FW: 285.4
Chemical Purity: $\geq 98\%$ (Artemisinin)
Deuterium Incorporation: $\geq 99\%$ deuterated forms (d₁-d₃); $\leq 1\%$ d₀
Supplied as: A solid
Storage: -20°C
Stability: ≥ 4 years

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Laboratory Procedures

Artemisinin-d₃ is intended for use as an internal standard for the quantification of artemisinin (Item No. 11816) by GC- or LC-MS. The accuracy of the sample weight in this vial is between 5% over and 2% under the amount shown on the vial. If better precision is required, the deuterated standard should be quantitated against a more precisely weighed unlabeled standard by constructing a standard curve of peak intensity ratios (deuterated *versus* unlabeled).

Artemisinin-d₃ is supplied as a solid. A stock solution may be made by dissolving the artemisinin-d₃ in the solvent of choice, which should be purged with an inert gas. Artemisinin-d₃ is slightly soluble in methanol and DMSO.

Description

Artemisinin is an endoperoxide antimalarial agent with anticancer activity.^{1,2} It reduces the growth of various *P. falciparum* strains *in vitro* (IC₅₀s = 3.98-20.36 nM) and reduces parasitemia in mice infected with *P. falciparum* with a curative dose (CD₅₀) value of 140 mg/kg.^{1,3} It also reduces *P. berghei* infection in mice (ED₅₀ = 5.6 mg/kg per day).⁴ Artemisinin (100-400 μ M) induces cell cycle arrest in the G₀/G₁ phase and apoptosis and inhibits growth of SK-N-AS, BE(2)-C, SK-N-DZ, and SHEP1 neuroblastoma cells in a time- and concentration-dependent manner.² It also suppresses BE(2)-C cell colony formation in a soft agar assay and reduces tumor growth in a BE(2)-C mouse xenograft model. Formulations containing artemisinin have been used in combination therapies for the treatment of malaria.
