# **PRODUCT** INFORMATION

**JCP251** 

Item No. 28712

| CAS Registry No.:      | 62252-26-0   |  |
|------------------------|--|--|
| Formal Name:           | 7-amino-4-chloro-3-methoxy-1H-                     |  |
|                        | 2-benzopyran-1-one                                 | Cl   |
| Synonym:               | JLK 6  |  |
| MF:                    | $C_{10}H_8CINO_3$                                  |  |
| FW:                    | 225.6  |  |
| Purity:                | ≥95%   |  |
| UV/Vis.:               | λ <sub>max</sub> : 238, 290 nm                     | $H_2N' \longrightarrow H_2N'$                                |
| Supplied as:           | A crystalline solid                                | 0  |
| Storage:               | -20°C  |  |
| Stability:             | ≥4 years   |  |
| Information represents | s the product specifications. Batch specific analy | rtical results are provided on each certificate of analysis. |

#### Laboratory Procedures

JCP251 is supplied as a crystalline solid. A stock solution may be made by dissolving the JCP251 in the solvent of choice, which should be purged with an inert gas. JCP251 is soluble in organic solvents such as DMSO. The solubility of JCP251 in this solvent is approximately 30 mg/ml.

JCP251 is sparingly soluble in aqueous buffers. For maximum solubility in aqueous buffers, JCP251 should first be dissolved in DMSO and then diluted with the aqueous buffer of choice. JCP251 has a solubility of approximately 0.16 mg/ml in a 1:5 solution of DMSO:PBS (pH 7.2) using this method. We do not recommend storing the aqueous solution for more than one day.

#### Description

JCP251 is a protease inhibitor.<sup>1</sup> It inhibits neutrophil elastase when used at a concentration of 5  $\mu$ M and reduces the activity of HIV protease and caspase-3 by 70 and 68%, respectively, when used at a concentration of 100 μM in cell-free assays.<sup>1,2</sup> JCP251 decreases amyloid-β (1-40) (Aβ40; Item No. 21617) and Aβ42 (Item No. 20574) levels in HEK293 cells expressing wild-type and Swedish mutant amyloid precursor peptide (APP;  $IC_{50}s = ~30 \mu M$  for both).<sup>3</sup>

#### SAFFTY DATA

This material should be considered hazardous until further information becomes available. Do not ingest, inhale, get in eyes, on skin, or on clothing. Wash thoroughly after handling. Before use, the user must review the complete Safety Data Sheet, which has been sent via email to your institution.

#### WARRANTY AND LIMITATION OF REMEDY

Buyer agrees to purchase the material subject to Cayman's Terms and Conditions. Complete Terms and Conditions including Warranty and Limitation of Liability information can be found on our website.
