PRODUCT INFORMATION

Aztreonam-d₆

Item No. 28799

CAS Registry No.: 1127452-94-1

Formal Name: 2-[(Z)-[1-(2-amino-4-thiazolyl)-2-[(2S,3S)-2-methyl-4-oxo-1-sulfo-3-azetidinyl]amino]-2-oxoethylidene]amino]oxy]-2-(methyl-d₃)-propanoic-3,3,3-d₃ acid

Synonym: SQ 26,776-d₆

MF: C₁₃H₁₁D₆N₅O₈S₂

FW: 441.5

Chemical Purity: ≥95% (Aztreonam)

Deuterium

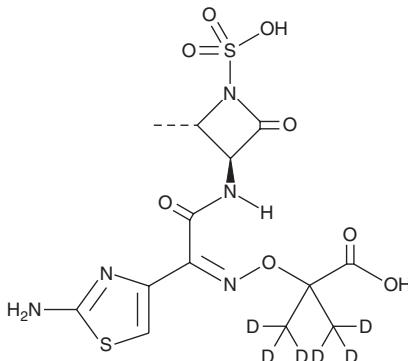

Incorporation: ≥99% deuterated forms (d₁-d₆); ≤1% d₀

Supplied as: A solid

Storage: -20°C

Stability: ≥2 years

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Laboratory Procedures

Aztreonam-d₆ is intended for use as an internal standard for the quantification of aztreonam (Item No. 19784) by GC- or LC-MS. The accuracy of the sample weight in this vial is between 5% over and 2% under the amount shown on the vial. If better precision is required, the deuterated standard should be quantitated against a more precisely weighed unlabeled standard by constructing a standard curve of peak intensity ratios (deuterated versus unlabeled).

Aztreonam-d₆ is supplied as a solid. A stock solution may be made by dissolving the aztreonam-d₆ in the solvent of choice, which should be purged with an inert gas. Aztreonam-d₆ is slightly soluble in methanol and DMSO.

Description

Aztreonam is a synthetic β-lactam antibiotic of the monobactam class.¹ It is active against clinical isolates of *E. coli*, *S. marcescens*, *P. aeruginosa*, *Klebsiella* species, *Proteus* species, and *Enterobacter* species (MICs = <0.1, 1.2, 5.2, 3.1, <0.1, and 19.3 µg/ml, respectively) but is inactive against *S. pneumoniae*, *B. fragilis*, and *S. faecalis* (MICs = >100 µg/ml for all). It interferes with peptidoglycan synthesis in the bacterial cell wall of the Gram-negative bacteria *E. coli*, *P. vulgaris*, *E. cloacae*, *K. pneumoniae*, and *P. aeruginosa* by inhibiting penicillin-binding protein 3 (PBP3; IC₁₀₀ = 0.1 µg/ml for all). It increases survival in mice with systemic Gram-negative bacterial infections (ED₅₀s = 0.1-24.7 mg/kg). Formulations containing aztreonam have been used in the treatment of *P. aeruginosa* infections in individuals with cystic fibrosis.

WARNING
THIS PRODUCT IS FOR RESEARCH ONLY - NOT FOR HUMAN OR VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.

SAFETY DATA

This material should be considered hazardous until further information becomes available. Do not ingest, inhale, get in eyes, on skin, or on clothing. Wash thoroughly after handling. Before use, the user must review the complete Safety Data Sheet, which has been sent via email to your institution.

WARRANTY AND LIMITATION OF REMEDY

Buyer agrees to purchase the material subject to Cayman's Terms and Conditions. Complete Terms and Conditions including Warranty and Limitation of Liability information can be found on our website.
