PRODUCT INFORMATION

Dacarbazine-d₆

Item No. 30771

CAS Registry No.: 1185241-28-4
Formal Name: 5-(3,3-dimethyl-1-triazen-1-yl)-1H-imidazole-4-d₆-carboxamide
MF: C₆H₄D₆N₆O
FW: 188.2
Chemical Purity: ≥95% (Dacarbazine)
Deuterium Incorporation: ≥99% deuterated forms (d₁-d₆); ≤1% d₀
Supplied as: A solid
Storage: -20°C
Stability: ≥2 years

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Laboratory Procedures

Dacarbazine-d₆ is intended for use as an internal standard for the quantification of dacarbazine (Item No. 21877) by GC- or LC-MS. The accuracy of the sample weight in this vial is between 5% over and 2% under the amount shown on the vial. If better precision is required, the deuterated standard should be quantitated against a more precisely weighed unlabeled standard by constructing a standard curve of peak intensity ratios (deuterated versus unlabeled).

Dacarbazine-d₆ is supplied as a solid. A stock solution may be made by dissolving the dacarbazine-d₆ in the solvent of choice, which should be purged with an inert gas. Dacarbazine-d₆ is slightly soluble in DMSO and methanol when heated.

Description

Dacarbazine is a DNA alkylating prodrug that is activated by P450 enzymes in liver microsomes.¹ Following activation, it is converted, through a series of reactions, into a methyldiazonium cation that alkylates DNA at all phases of the cell cycle and induces apoptosis. *In vitro*, dacarbazine inhibits the growth of B16/F1, A-875, and SK-MEL-5 melanoma and non-cancerous WI-38 lung fibroblast and L-02 hepatocyte cell lines (IC₅₀s = 260, 287, 380, 526, and 367 μM, respectively).² Dacarbazine toxicity to 518A2 and SK-MEL-28 melanoma cell lines increases in a time-dependent manner with IC₅₀ values of 121 and >400 μM, respectively, following a 1 hour incubation and 2.5 and 50 μM, respectively, following a 96 hour incubation.³ *In vivo*, dacarbazine (70 mg/kg, once every 2 days) decreases tumor volume by 59.1% in a B16/F1 murine melanoma model in mice.² Formulations containing dacarbazine have been used in the treatment of metastatic melanoma and for Hodgkin's lymphoma in combination with other antineoplastic agents.

WARNING

THIS PRODUCT IS FOR RESEARCH ONLY - NOT FOR HUMAN OR VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.

SAFETY DATA

This material should be considered hazardous until further information becomes available. Do not ingest, inhale, get in eyes, on skin, or on clothing. Wash thoroughly after handling. Before use, the user must review the [complete](#) Safety Data Sheet, which has been sent via email to your institution.

WARRANTY AND LIMITATION OF REMEDY

Buyer agrees to purchase the material subject to Cayman's Terms and Conditions. Complete Terms and Conditions including Warranty and Limitation of Liability information can be found on our website.
