PRODUCT INFORMATION

Garcinone D

Item No. 30906

CAS Registry No.: 107390-08-9

Formal Name: 1,3,6-trihydroxy-8-(3-hydroxy-3-methylbutyl)-7-methoxy-2-(3-methyl-2-but-en-1-yl)-9H-xanthan-9-one

MF: C₂₄H₂₈O₇

FW: 428.5

Purity: ≥95%

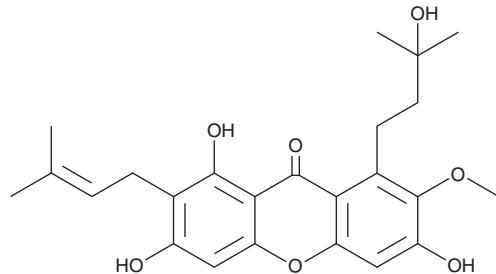

UV/Vis.: λ_{max}: 244, 318 nm

Supplied as: A crystalline solid

Storage: -20°C

Stability: ≥2 years

Item Origin: Plant/*Garcinia mangostana* L.

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Laboratory Procedures

Garcinone D is supplied as a crystalline solid. A stock solution may be made by dissolving the garcinone D in the solvent of choice, which should be purged with an inert gas. Garcinone D is soluble in the organic solvent DMSO at a concentration of approximately 100 mg/ml.

Description

Garcinone D is a xanthone that has been found in *G. mangostana* and has diverse biological activities.¹ It increases proliferation of C17.2 neural progenitor cells (NPCs) when used at a concentration of 5 μM, an effect that can be reduced by inhibition of the antioxidative transcription factor nuclear factor erythroid 2-related factor 2 (Nrf2). It increases phosphorylation of STAT3 and cyclin D1 and the protein levels of Nrf2 and heme oxygenase-1 (HO-1) in a concentration-dependent manner. Garcinone D (3 μM) inhibits aggregation of amyloid-β (1-42) (Aβ42; Item No. 20574) *in vitro* and inhibits beta-secretase 1 (BACE1) by 62.7% when used at a concentration of 100 μM.² It scavenges peroxynitrite radicals with an IC₅₀ value of 26.4 μM.³
