# PRODUCT INFORMATION

## Mozavaptan-d<sub>6</sub> Item No. 31321

**CAS Registry No.:** 2750534-83-7  
**Formal Name:** N-[4-[[5-(dimethyl-d<sub>6</sub>-amino)-2,3,4,5-tetrahydro-1H-1-benzazepin-1-yl]carbonyl]phenyl]-2-methyl-benzamide  
**MF:** C<sub>27</sub>H<sub>23</sub>D<sub>6</sub>N<sub>3</sub>O<sub>2</sub>  
**FW:** 433.6  
**Chemical Purity:** ≥98% (Mozavaptan)  
**Deuterium Incorporation:** ≥99% deuterated forms (d<sub>1</sub>-d<sub>6</sub>); ≤1% d<sub>0</sub>  
**Supplied as:** A solid  
**Storage:** -20°C  
**Stability:** ≥4 years

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

### Laboratory Procedures

Mozavaptan-d<sub>6</sub> is intended for use as an internal standard for the quantification of mozavaptan (Item No. 16664) by GC- or LC-MS. The accuracy of the sample weight in this vial is between 5% over and 2% under the amount shown on the vial. If better precision is required, the deuterated standard should be quantitated against a more precisely weighed unlabeled standard by constructing a standard curve of peak intensity ratios (deuterated versus unlabeled).

Mozavaptan-d<sub>6</sub> is supplied as a solid. A stock solution may be made by dissolving the mozavaptan-d<sub>6</sub> in the solvent of choice, which should be purged with an inert gas. Mozavaptan-d<sub>6</sub> is soluble in DMSO and dimethyl formamide. Mozavaptan-d<sub>6</sub> is soluble in a 1:1 solution of acetonitrile:methanol.

### Description

Mozavaptan is an orally bioavailable antagonist of vasopressin V<sub>2</sub> receptors (K<sub>i</sub> = 9.42 nM in HeLa cells expressing the human receptor).<sup>1,2</sup> It is selective for vasopressin V<sub>2</sub> over V<sub>1</sub> receptors (IC<sub>50</sub>s = 14 and 1,200 nM, respectively) in radioligand binding assays using rat kidney and rat liver membranes that endogenously express high levels of vasopressin V<sub>2</sub> and V<sub>1</sub> receptors, respectively.<sup>1</sup> Mozavaptan (10-30 mg/kg, p.o.) increases urine volume and decreases urine osmolality, indicating aquaresis, in conscious rats. It reduces decreases in urine flow and increases in urine osmolality induced by arginine vasopressin (AVP; Item No. 24154) in anesthetized rats when administered intravenously at doses ranging from 10 to 100 µg/kg.

#### WARNING

THIS PRODUCT IS FOR RESEARCH ONLY - NOT FOR HUMAN OR VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.

#### SAFETY DATA

This material should be considered hazardous until further information becomes available. Do not ingest, inhale, get in eyes, on skin, or on clothing. Wash thoroughly after handling. Before use, the user must review the [complete](#) Safety Data Sheet, which has been sent via email to your institution.

#### WARRANTY AND LIMITATION OF REMEDY

Buyer agrees to purchase the material subject to Cayman's Terms and Conditions. Complete Terms and Conditions including Warranty and Limitation of Liability information can be found on our website.
