PRODUCT INFORMATION

Methylatropine (bromide)

Item No. 33433

CAS Registry No.: 2870-71-5
Formal Name: 3-(3-hydroxy-1-oxo-2-phenylpropoxy)-8,8-dimethyl-8-azoniabicyclo[3.2.1]octane, monobromide
Synonym: NSC 61810
MF: $C_{18}H_{26}NO_3 \cdot Br$
FW: 384.3
Purity: $\geq 95\%$
Supplied as: A crystalline solid
Storage: $-20^{\circ}C$
Stability: ≥ 2 years

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Laboratory Procedures

Methylatropine (bromide) is supplied as a crystalline solid. A stock solution may be made by dissolving the methylatropine (bromide) in water. The solubility of methylatropine (bromide) in water is approximately 10 mg/ml. We do not recommend storing the aqueous solution for more than one day.

Description

Methylatropine is an antagonist of muscarinic acetylcholine receptors ($IC_{50} = <0.1$ nM in a radioligand binding assay using isolated porcine brain membranes) and a derivative of atropine (Item No. 12008).^{1,2} It reduces acetylcholine-induced decreases in blood pressure in rats when administered intravenously with an ED_{50} value of 5.5 $\mu g/kg$.² Methylatropine reduces salivation, induces mydriasis, and increases heart rate in dogs.³

WARNING

THIS PRODUCT IS FOR RESEARCH ONLY - NOT FOR HUMAN OR VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.

SAFETY DATA

This material should be considered hazardous until further information becomes available. Do not ingest, inhale, get in eyes, on skin, or on clothing. Wash thoroughly after handling. Before use, the user must review the complete Safety Data Sheet, which has been sent via email to your institution.

WARRANTY AND LIMITATION OF REMEDY

Buyer agrees to purchase the material subject to Cayman's Terms and Conditions. Complete Terms and Conditions including Warranty and Limitation of Liability information can be found on our website.
