PRODUCT INFORMATION

O-Phosphoethanolamine

Item No. 34636

CAS Registry No.: 1071-23-4
Formal Name: 2-amino-ethanol 1-(dihydrogen phosphate)
Synonyms: O-Phosphorylethanolamine, NSC 254167
MF: $C_2H_8NO_4P$
FW: 141.1
Purity: $\geq 95\%$
Supplied as: A solid
Storage: $-20^\circ C$
Stability: ≥ 2 years

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Laboratory Procedures

O-Phosphoethanolamine is supplied as a solid. Aqueous solutions of O-phosphoethanolamine can be prepared by directly dissolving the solid in aqueous buffers. The solubility of O-phosphoethanolamine in PBS (pH 7.2) is approximately 10 mg/ml. We do not recommend storing the aqueous solution for more than one day.

Description

O-Phosphoethanolamine is an endogenous phospholipid metabolite.¹ It is also a precursor in the biosynthesis of phosphatidylethanolamines in the endoplasmic reticulum. O-Phosphoethanolamine is also incorporated into lipid A, a component of LPS.² It decreases disease severity in a mouse model of cerulein-induced acute pancreatitis.³ Levels of O-phosphoethanolamine are decreased in postmortem amygdala from patients with Parkinson's disease.⁴

WARNING

THIS PRODUCT IS FOR RESEARCH ONLY - NOT FOR HUMAN OR VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.

SAFETY DATA

This material should be considered hazardous until further information becomes available. Do not ingest, inhale, get in eyes, on skin, or on clothing. Wash thoroughly after handling. Before use, the user must review the [complete](#) Safety Data Sheet, which has been sent via email to your institution.

WARRANTY AND LIMITATION OF REMEDY

Buyer agrees to purchase the material subject to Cayman's Terms and Conditions. Complete Terms and Conditions including Warranty and Limitation of Liability information can be found on our website.
