PRODUCT INFORMATION

Euscaphic Acid

Item No. 36162

CAS Registry No.: 53155-25-2

Formal Name: 2 α ,3 α ,19-trihydroxy-urs-12-en-28-oic acid

MF: C₃₀H₄₈O₅

FW: 488.7

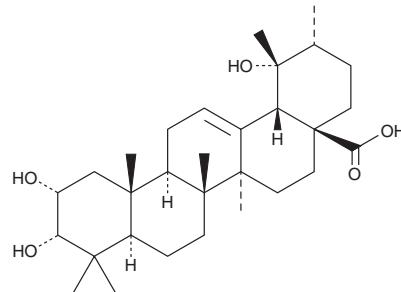

Purity: ≥98%

Supplied as: A solid

Storage: -20°C

Stability: ≥4 years

Item Origin: Synthetic

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Laboratory Procedures

Euscaphic acid is supplied as a solid. A stock solution may be made by dissolving the euscaphic acid in the solvent of choice, which should be purged with an inert gas. Euscaphic acid is soluble in methanol.

Description

Euscaphic acid is a triterpene that has been found in *R. alceaefolius* and has diverse biological activities.¹⁻³ It inhibits the proliferation of CNE-1 and C666-1 nasopharyngeal carcinoma cells when used at concentrations of 5 and 10 µg/ml.¹ Euscaphic acid inhibits acetylcholinesterase (AChE; IC₅₀ = 35.9 µM) and α-glucosidase (IC₅₀ = 24.9 µM).² It reduces the production of nitric oxide (NO) and levels of inducible nitric oxide synthase (iNOS) and COX-2 in LPS-stimulated RAW 264.7 cells.³ Euscaphic acid (10 mg/kg) reduces serum IgE and IgG2a levels, ear tissue mast cell infiltration, and pruritis in a mouse model of difluoroethane- and 2,4-dinitrochlorobenzene-induced atopic dermatitis.⁴
