Laboratory Procedures

Lentztrehalose B is supplied as a solid. A stock solution may be made by dissolving the lentztrehalose B in the solvent of choice, which should be purged with an inert gas. Lentztrehalose B is soluble in organic solvents such as DMSO and methanol. Lentztrehalose B is also soluble in water. We do not recommend storing the aqueous solution for more than one day.

Description

Lentztrehalose B is a disaccharide microbial metabolite that has been found in *Lentzea* and has diverse biological activities.¹ It has antioxidant activity in an oxygen radical absorbance capacity (ORAC) assay when used at a concentration of 100 μM. Lentztrehalose B (10 mM) inhibits the activity of porcine kidney trehalase, the trehalose metabolizing enzyme. It induces autophagy in MeWo melanoma and OVK18 ovarian cancer cells when used at a concentration of 100 mM.
