PRODUCT INFORMATION

sPLA₂ (human, recombinant type IIE)

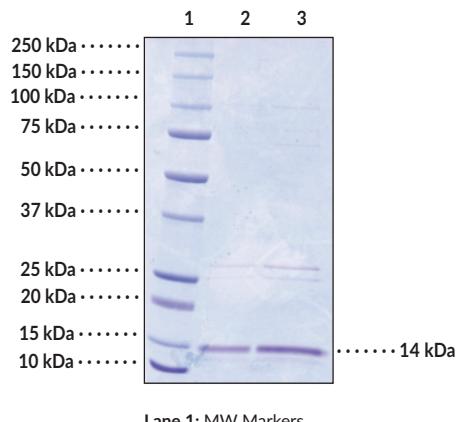

Item No. 37955

Overview and Properties

Synonyms:	GIIE sPLA ₂ , Group IIE Secretory Phospholipase A ₂ , Phosphatidylcholine 2-Acylhydrolase 2E, Phospholipase A ₂ Group IIE, sPLA ₂ -IIE
Source:	Active recombinant human sPLA ₂ (Type IIE) expressed in <i>E. coli</i>
Amino Acids:	32-154
Uniprot No.:	Q9NZK7
Molecular Weight:	14 kDa
Storage:	-80°C (as supplied)
Stability:	≥2 years
Purity:	≥80% estimated by SDS-PAGE
Supplied in:	25 mM Tris, pH 7.5, with 100 mM potassium chloride and 10 mM calcium chloride
Protein	
Concentration:	batch specific mg/ml
Activity:	batch specific U/ml
Specific Activity:	batch specific U/mg
Unit Definition:	One unit is defined as the amount of enzyme required to hydrolyze 1 μmol of diheptanoyl thio-PC per minute at 25°C in 25 mM Tris-HCl, pH 7.5, containing 10 mM calcium chloride, 100 mM potassium chloride, 0.3 mM Triton X-100, 0.44 mM DTNB, and 1.48 mM diheptanoyl thio-PC

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Lane 2: sPLA₂ (4 μg)

SDS-PAGE Analysis of sPLA₂ (human, recombinant type IIE).

Representative gel image shown; actual purity may vary between each batch.

sPLA₂ Type IIE activity was determined using Cayman's sPLA₂ Assay Kit (Item No. 765001) with 1.48 mM 1,2-bis(heptanoylthio) glycerophosphocholine (diheptanoyl thio-PC; Item No. 62235) as the substrate.

WARNING
THIS PRODUCT IS FOR RESEARCH ONLY - NOT FOR HUMAN OR VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.

SAFETY DATA

This material should be considered hazardous until further information becomes available. Do not ingest, inhale, get in eyes, on skin, or on clothing. Wash thoroughly after handling. Before use, the user must review the complete Safety Data Sheet, which has been sent via email to your institution.

WARRANTY AND LIMITATION OF REMEDY

Buyer agrees to purchase the material subject to Cayman's Terms and Conditions. Complete Terms and Conditions including Warranty and Limitation of Liability information can be found on our website.

PRODUCT INFORMATION

Description

Secretory phospholipase A₂ (sPLA₂) (Type IIE) is a calcium-dependent PLA₂ superfamily member encoded by *PLA2G2E* in humans.¹ It is composed of a highly conserved calcium-binding loop, a catalytic domain, and a Type II-specific disulfide-containing C-terminal extension but lacks the N-terminal signal peptide found in sPLA₂ (Type IB) and sPLA₂ (Type X). It also contains a second calcium-binding site that is essential for its catalytic activity.^{2,3} sPLA₂ (Type IIE) is expressed in the brain, heart, lung, and placenta, as well as in hair follicles.⁴ It catalyzes the hydrolysis of phospholipids at the *sn*-2 position, preferentially releasing oleic acid (Item Nos. 90260 | 24659) from phosphatidylglycerol (PG) but also linoleic acid (Item Nos. 90150 | 90150.1 | 21909) or oleic acid from phosphatidylethanolamine (PE). It is involved in lipid metabolism, inflammatory processes, and regulation of lipolysis in adipocytes.^{2,4,5} sPLA₂ (Type IIE) protein is upregulated in the kidney, small intestine, and lung following LPS administration in mice.⁴ Cayman's sPLA₂ (human, recombinant type IIE) protein can be used for enzyme activity assays.
