PRODUCT INFORMATION

ACPT-I

Item No. 78010

CAS Registry No.: 194918-76-8

Formal Name: (4 β)-amino-1 α ,2 α ,4-cyclopentanetricarboxylic acid

MF: C₈H₁₁NO₆

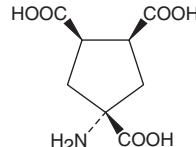

FW: 217.2

Purity: \geq 98%

Supplied as: A crystalline solid

Storage: Room temperature

Stability: \geq 2 years

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Laboratory Procedures

ACPT-I is supplied as a crystalline solid. A stock solution may be made by dissolving the ACPT-I in water. The solubility of ACPT-I in water is approximately 2 mg/ml. We do not recommend storing the aqueous solution for more than one day.

Description

ACPT-I is an agonist of the group III metabotropic glutamate receptors (mGluRs) mGluR4a and mGluR8 (EC_{50} s = 7.2 and 8.2 μ M, respectively) that has no effect on mGluR1a or mGluR2.¹ It has diverse biological activity, including neuroprotective, anticonvulsant, and anxiolytic-like effects.²⁻⁵ ACPT-I (1-200 μ M) reduces cell death following oxygen-glucose deprivation in primary neuronal cultures and in a rat model of middle cerebral artery occlusion when used at a dose of 30 mg/kg.² It is neuroprotective against excitotoxicity induced by kainite *in vitro* and *in vivo* and reduces the incidence of clonic seizures in various seizure models in mice and rats (ED_{50} s = 0.08-49.3 nM, i.c.v.).^{3,4} ACPT-I also has anxiolytic-like effects in mice and rats, however, these effects can be blocked by WAY-100635 (Item No. 14599) and flumazenil (Item No. 14252), indicating the involvement of the serotonin (5-HT) receptor subtype 5-HT_{1A} and GABA_A receptor.⁵
