Recombinant Human S100 Calcium Binding Protein B

CLPRO306
CLPRO306-2
CLPRO306-3
Lot:

INTRODUCTION:

S100b is a member of the S100 family of proteins which are a family of EF-hand calcium binding proteins that exist mostly as dimers of the 20 currently identified individual S100 monomers. The S100B homodimer is expressed in cells of the central nervous system, glial cells and in certain peripheral cells e.g. Schwann cells, melanocytes, adipocytes and chondrocytes. S100 proteins are localized either in the cytoplasm or the nucleus of a wide range of cells. S100 proteins are involved in the regulation of a number of cellular processes such as cell cycle progression and differentiation. There are at least 13 members in the S100 gene family, which are located as a cluster on chromosome 1q21; however, S100b is located at 21q22.3. The determination of S100B in serum levels may be used to monitor the extent of brain injury and malignant melanoma. S100b proteins may have a role in Neurite extension, proliferation of melanoma cells, stimulation of Ca^{2+} fluxes, inhibition of PKC-mediated phosphorylation, astrocytosis and axonal proliferation, and inhibition of microtubule assembly. Chromosomal rearrangements and altered expression of the S100b gene are implicated in several neurological, neoplastic, and other types of diseases, including Alzheimer's disease, Down's syndrome, epilepsy, amyotrophic lateral sclerosis, melanoma, and type I diabetes.

DESCRIPTION:

Recombinant Human S100B produced in *E.Coli* is single, a non-glycosylated, Polypeptide chain containing 91 amino acids fragment (2-92) with an amino-terminal hexahistidine tag and having a total molecular mass of 14.7kDa. The S100B is purified by proprietary chromatographic techniques

SYNONYMS:

Protein S100-B, S100 calcium-binding protein B, S-100 protein subunit beta, S-100 protein beta chain, S100B, NEF, S100, S100beta

SOURCE:

E.coli

PRESENTATION:

5 µg (CLPRO306), 20 µg (CLPRO306-2) or 1 mg (CLPRO306-3), sterile filtered clear solution (2 mg/ml). S100B is supplied in 20 mM Tris-HCl, pH 8 and 50% glycerol.

STABILITY:

Store at 4°C if entire vial will be used within 2-4 weeks. Store frozen at -20°C for longer periods of time. Please avoid freeze thaw cycles.

CEDARLANE®

www.cedarlanelabs.com

An ISO 9001:2000 and ISO 13485:2003
registered company.

In CANADA: Toll Free: 1-800-268-5058

4410 Paletta Court, Burlington, ON L7L 5R2 ph: (289) 288-0001, fax: (289) 288-0020
e-mail: general@cedarlanelabs.com

In the USA: Toll Free: 1-800-721-1644

1210 Turrentine Street, Burlington, NC 27215 ph: (336) 513-5135, fax: (336) 513-5138
e-mail: service@cedarlanelabs.com

PURITY:

Greater than 95% as determined by:

(a) Analysis by RP-HPLC

(b) Analysis by SDS-PAGE

Laboratory Reagent For Research Use Only

JV 01/14/11
