

# SZABO SCANDIC

Part of Europa Biosite

## Produktinformation

Forschungsprodukte & Biochemikalien

Zellkultur & Verbrauchsmaterial

Diagnostik & molekulare Diagnostik

Laborgeräte & Service

## Recombinant Human BAD

CLPRO458  
CLPRO458-2  
Lot:

**Description:** The Bcl-2 family of protein is characterized by its ability to modulate cell death under a broad range of physiologic conditions. Bcl-2 and several related proteins function to inhibit apoptosis while other members of the Bcl-2 family, such as Bax and Bak, enhance cell death under various conditions. Bad exhibits homology to Bcl-2 limited to the BH1, but not with Bax, Bcl-xS, Mcl-1, A1 or itself. In mammalian cells, Bad binds with greater affinity to Bcl-xL than to Bcl-2 and reverses the death repressor activity of Bcl-xL but not Bcl-2.

**Source:** Recombinant full length human BAD protein expressed in *E.coli*

**Format:** 2 ug (CLPRO458) or 5ug (CLPRO458-2) sterile filtered lyophilized powder.

**Formulation:** Purified human BAD protein at 100µg/ml in 50mM Tris-Acetate, pH7.5, 1mM EDTA and 20% Glycerol.

**Application and Suggested Dilutions:**

- ELISA
- Inhibition Assays
- Western Blotting

**Characterization:** On SDS-PAGE commassie blue stained gel, the purified recombinant protein shows a band at 51 kDa.

**Stability:** Store vial at -20°C to -80°C. When stored at the recommended temperature, this protein is stable for 12 months.

**For Research Use Only. Not for Diagnostic or Therapeutic Work.**

JJ 12/11/06
