

**SZABO  
SCANDIC**

Part of Europa Biosite

## Produktinformation

Forschungsprodukte & Biochemikalien

Zellkultur & Verbrauchsmaterial

Diagnostik & molekulare Diagnostik

Laborgeräte & Service

Weitere Information auf den folgenden Seiten!  
See the following pages for more information!

### Lieferung & Zahlungsart

siehe unsere [Liefer- und Versandbedingungen](#)

### Zuschläge

- Mindermengenzuschlag
- Trockeneiszuschlag
- Gefahrgutzuschlag
- Expressversand

## Recombinant Streptavidin

**CLPRO791**

**CLPRO791-2**

**CLPRO791-3**

**Introduction:** Streptavidin is a tetrameric protein secreted by *Streptomyces avidinii* which binds firmly to biotin. Streptavidin is widely used in molecular biology through its unique high affinity for the vitamin biotin. The dissociation constant ( $K_d$ ) of the biotin-streptavidin complex is about ~10-15 mol/L. The strong affinity recognition of biotin and biotinylated molecules has made streptavidin one of the most important components in diagnostics and laboratory kits. The streptavidin/biotin system has one of the biggest free energies of association of yet observed for noncovalent binding of a protein and small ligand in aqueous solution ( $K_{assoc} = 10^{**14}$ ). The complexes are also extremely stable over a wide range of temperature and pH.

**Description:** Streptavidin *Streptomyces Avidinii* Recombinant produced in E.Coli. The molecular weight per tetramer is approximately 53kDa. Extinction coefficient per subunit:  $41326\text{ M}^{-1}\text{ cm}^{-1}$ .

**Source:** *Escherichia Coli*.

**Presentation:** 5 mg (**CLPRO791**), 20 mg (**CLPRO791-2**), or 1 g (**CLPRO791-3**), sterile filtered white lyophilized (freeze-dried) powder. Lyophilized in 10mM potassium phosphate buffer pH 6.5.

**Solubility:** It is recommended to reconstitute the lyophilized Streptavidin in sterile 18M-cm H<sub>2</sub>O not less than 100 $\mu$ g/ml, which can then be further diluted to other aqueous solutions.

**Stability:** Streptavidin is shipped at ambient temperature, upon arrival store at -20°C.

**Purity:** Greater than 98% as determined by SDS-PAGE.

**Specific Activity:** > 17U/mg (one unit binds 1  $\mu$ g D-biotin at pH 8.9).

**Proteolytic Activity:** <  $10^{-3}$  U/mg protein (Azocoll, 25°C, 24 h, pH 8.0).

**Amino Acid Sequence:**
