## Purified Mouse Anti-Human T Cell, CD45RO Monoclonal Antibody

CLSG36603

CLSG36603-05

Lot:

|                                |                                                                                                                                                                                                                                                                                                        |
|--------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Immunogen:</b>              | BALB/C mice were immunized with IL-2 dependent T cell line, CA1.                                                                                                                                                                                                                                       |
| <b>Clone:</b>                  | UCHL1                                                                                                                                                                                                                                                                                                  |
| <b>Isotype:</b>                | IgG2a, Kappa                                                                                                                                                                                                                                                                                           |
| <b>Format:</b>                 | 1 ml (CLSG36603) or 0.5 ml (CLSG36603-05). This antibody is supplied as purified immunoglobulin containing sodium azide as preservative.                                                                                                                                                               |
| <b>Titer/Working Dilution:</b> | This antibody may be diluted to a titer of 1:25-1:50 in an ABC method. However, depending on the staining conditions employed, we suggest that final dilution should be determined by the user.                                                                                                        |
| <b>Staining Protocol:</b>      | We suggest an incubation period of 30 minutes at room temperature. However, depending upon the fixation conditions and the staining system employed, optimal incubation should be determined by the user. <u>Suitable for formalin/paraffin tissues.</u>                                               |
| <b>Specificity:</b>            | This antibody reacts with a 180 kDa glycoprotein of CD45 family, occurring on most thymocytes and activated T cells but only on the portion of the resting T cells. It reacts with most thymocytes, a subpopulation of resting cells within both the CD4 and CD8 subsets and mature activated T cells. |
| <b>Positive Control:</b>       | Tonsil                                                                                                                                                                                                                                                                                                 |
| <b>Cellular Localization:</b>  | Cell membrane                                                                                                                                                                                                                                                                                          |
| <b>Storage:</b>                | Store the antibody at 2-8°C. Do not use it beyond the expiration date stated on the label.                                                                                                                                                                                                             |
