Purified Mouse Anti-Human Granulocyte Monoclonal Antibody

CLSG36729

CLSG36729-05

Lot:

Immunogen:

BALB/c mice were immunized with nuclei from pokeweed mitogen stimulated human peripheral blood lymphocytes.

Clone:

BM-2

Isotype:

IgG1

Format:

1 ml (CLSG36729) or 0.5 ml (CLSG36729-05). This antibody is supplied as purified immunoglobulin fraction containing sodium azide as preservative.

Titer/Working Dilution:

This antibody may be diluted to a titer of 1:25-1:50 in an ABC method. However, depending on the staining conditions employed, we suggest that final dilution should be determined by the user.

Staining Protocol:

We suggest an incubation period of 30 minutes at room temperature. However, depending upon the fixation conditions and the staining system employed, optimal incubation should be determined by the user. Suitable for formalin/ paraffin tissues.

Specificity:

This antibody is specific to mature granulocytes. It does not react with other types of cells in human tissues. BM-2 reacts with early precursor and mature forms of human myeloid cells. This antibody is useful in the detection of myeloid leukemia and granulocytic sarcoma.

Positive Control:

Tonsil

Cellular Localization:

Cytoplasmic

Storage:

Store the antibody at 2-8°C. Do not use it beyond the expiration date stated on the label.

Laboratory Reagent For Research Use Only

JV 02/12/08
