Purified Rabbit Anti-Human CD95 (Fas) Polyclonal Antibody

CLSG36911

Lot:

Immunogen:

A synthetic peptide from the C-terminus of human Fas protein.

Host:

Rabbit

Format:

1 ml of purified immunoglobulin fraction of rabbit antiserum against human CD95 containing sodium azide as preservative.

Titer/Working Dilution:

This antibody may be diluted to a titer of 1:25-1:50 in an ABC method. However, depending on the staining conditions employed, we suggest that final dilution should be determined by the user.

Staining Protocol:

We suggest an incubation period of 30 minutes at room temperature. However, depending upon the fixation conditions and the staining system employed, optimal incubation conditions should be determined by the user. High temperature treatment of formalin-fixed tissue sections with 10mM citrate buffer, pH 6.0 must be performed prior to the immunostaining.

Specificity:

This antibody reacts with a 48 kD transmembrane glycoprotein, known as CD95 (Fas). The Fas antigen is expressed on the surface of various cell types, including activated T and B lymphocytes and T lymphoblastoid cell lines. CD95 mediates receptor-triggered apoptosis.

Positive Control:

Small intestine

Cellular Localization:

Cell membrane

Storage:

Store the antibody at 4-8°C. Do not use it beyond the expiration date stated on the label.
