Rabbit Anti-Human Flt-1 Polyclonal Antibody

CLSG36934
CLSG36934-05
Lot:

- Immunogen:** A synthetic peptide derived from the C-terminus of the Flt-1 precursor of human origin.
- Clone:** Polyclonal
- Isotype:** Rabbit IgG
- Format:** 1 ml (CLSG36934), or 0.5 ml (CLSG36934-05). Purified immunoglobulin fraction of rabbit antiserum against human Flt-1 containing sodium azide as a preservative.
- Titer/Working Dilution:** This antibody may be diluted to a titer of 1:50-1:100 in an ABC method. The final dilution should be determined by the user based upon the staining conditions employed.
- Staining Protocol:** We suggest an incubation period of 30 minutes at room temperature. Optimal incubation conditions should be determined by the user based upon the fixation conditions and staining system employed. Formalin fixed paraffin embedded tissue sections require high temperature antigen unmasking with 10 mM citrate buffer, pH 6.0 prior to immunostaining.
- Specificity:** This antibody reacts with a 180 kD protein, known as Flt-1/Vascular endothelial growth factor receptor 1. Flt-1 is a cell membrane receptor kinase. Flk-1 has a high affinity receptor for vascular endothelial growth factor and is putatively involved in the growth of endothelial cells and angiogenesis. This antibody cross reacts with mouse and rat.
- Positive Control:** Angiosarcoma
- Cellular Localization:** Cytoplasmic
- Storage:** Store at 2-8°C. Do not use beyond the expiration date stated on the label.
