## Rabbit Anti-Human Gastrin Polyclonal Antibody

CLSG36936

CLSG36936-05

Lot:

|                                |                                                                                                                                                                                                                                                                                                                                    |
|--------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Immunogen:</b>              | Recombinant Gastrin conjugated to KLH.                                                                                                                                                                                                                                                                                             |
| <b>Host:</b>                   | Rabbit                                                                                                                                                                                                                                                                                                                             |
| <b>Format:</b>                 | 1 ml (CLSG36936) or 0.5 ml (CLSG36936-05), whole rabbit antiserum against gastrin containing sodium azide as preservative.                                                                                                                                                                                                         |
| <b>Titer/Working Dilution:</b> | This antibody may be diluted to a titer of 1:50-1:100 in an ABC method. However, depending on the staining conditions employed, we suggest that final dilution should be determined by the user.                                                                                                                                   |
| <b>Staining Protocol:</b>      | We suggest an incubation period of 30 minutes at room temperature. However, depending upon the fixation conditions and the staining system employed, optimal incubation conditions should be determined by the user. <u>Suitable for formalin/paraffin tissues.</u>                                                                |
| <b>Specificity:</b>            | The antibody is specific against gastrin-containing cells. This antibody reacts with human gastrin I and human gastrin I fragments. No cross reactivity was observed with rat gastrin, human big gastrin, human gastrin releasing peptide, sulfated cholecystokinin amide, non-sulfated cholecystokinin amide and cholecystokinin. |
| <b>Positive Control:</b>       | Stomach                                                                                                                                                                                                                                                                                                                            |
| <b>Cellular Localization:</b>  | Cytoplasmic                                                                                                                                                                                                                                                                                                                        |
| <b>Storage:</b>                | Store the antibody at 2-8°C. Do not use it beyond the expiration date stated on the label.                                                                                                                                                                                                                                         |
