Purified Rabbit Anti-Human IgE Polyclonal Antibody

CLSG36950
CLSG36950-05
Lot:

Immunogen: IgE isolated from the serum of a patient with IgE-myeloma.

Host: Rabbit

Format: 1 ml (CLSG36950) or 0.5 ml (CLSG36950-05), purified immunoglobulin fraction of rabbit antiserum against human IgE containing sodium azide as preservative.

Titer/Working Dilution: This antibody may be diluted to a titer of 1:50-1:500 in an ABC method. However, depending on the staining conditions employed, we suggest that final dilution should be determined by the user.

Staining Protocol: We suggest an incubation period of 30 minutes at room temperature. However, depending upon the fixation conditions and the staining system employed, optimal incubation conditions should be determined by the user. Proteolytic treatment is required prior to immunostaining of formalin fixed paraffin embedded tissue sections.

Specificity: This antibody reacts with the epsilon chain of human IgE. Traces of contaminating antibodies have been removed by solid phase absorption. Only the IgE arch appeared in crossed immunoelectrophoresis.

Positive Control: Tonsil

Cellular Localization: Cytoplasmic

Storage: Store the antibody at 2-8°C. Do not use it beyond the expiration date stated on the label.

Laboratory Reagent For Research Use Only.

JV 08/24/07
