Fast Red TR Salt Tablets

CLSG80084

Lot:

Size: 20 Tablets

Introduction: Fast Red tablets are used as chromogen for alkaline phosphatase (ALP) based immunostaining systems. ALP hydrolyses naphthol phosphate esters to phenolic compounds and phosphates. The phenol couple to colourless diazonium salts to produce insoluble coloured azo dye. Fast Red produces a red coloured end product.

Procedure:

- i) Remove the tablet container from the refrigerator and allow to stand at room temperature for 10-15 minutes.
- ii) Take 4.75 ml of Distilled water in a tube. Add 250 µl of buffer and mix.
- iii) Add one tablet to 5 ml of buffer. Let the tablet dissolve.
- iv) Add 50 µl of naphthol AS-MX and mix.

Storage: Store refrigerated. Keep dry. Warm to room temperature before opening.

Laboratory Reagent For Research Use Only
