Rabbit anti-Cyclin D1/bcl-1 Polyclonal Antibody

CLSG80440

Lot#:

Immunogen:

A synthetic peptide from c-terminus of human cyclin D1.

Host:

Rabbit

Size:

1 ml

Format:

Purified immunoglobulin fraction of rabbit antiserum against Cyclin D1 containing sodium azide as preservative.

Titer/Working Dilution:

This antibody may be diluted to a titer of 1:50-1:200 in an ABC method. However, depending on the staining conditions employed, we suggest that final dilution should be determined by the user.

Staining Protocol:

We suggest an incubation period of 30 minutes at room temperature. However, depending upon the fixation conditions and the staining system employed, optimal incubation conditions should be determined by the user. Formalin fixed paraffin embedded tissue sections require high temperature antigen unmasking with 10 mM citrate buffer, pH 6.0 prior to immunostaining.

Specificity:

This antibody reacts with a 36 kD protein. Cyclin D1 or PRAD-1 or bcl-1 is one of the key cell cycle regulators and functions in association with cdk4 and / or cdk6 by phosphorylating the Rb protein. It is a putative proto-oncogene overexpressed in a wide variety of human neoplasms including mantle cell lymphomas (MCL). This antibody reacts with mouse and rat.

Positive Control:

Breast carcinoma, mantle cell lymphoma

Cellular Localization:

Nuclear

Storage:

Store the antibody at 4°C. Do not use it beyond the expiration date stated on the label.

For Research Use Only. Not for Diagnostic or Therapeutic Work.

JCr 04/10/06
