Mouse anti-Human CD25/IL-2R alpha Pre-diluted Monoclonal Antibody

CLSG90475

Lot:

Immunogen: BALB/C mice were injected with recombinant human interleukin- 2 receptor.

Clone: IL2R.1

Isotype: IgG1, kappa

Format: **6 ml.** This antibody has been pre-titered and quality controlled to work on formalin-fixed paraffin-embedded and acetone fixed cryostat tissue sections. No further titration is required.

Staining Protocol: We suggest an incubation period of 30 minutes at room temperature. Optimal incubation conditions should be determined by the user based upon the fixation conditions and staining system employed. Formalin fixed paraffin embedded tissue sections require high temperature antigen unmasking with 10mM citrate buffer, pH 6.0 prior to immunostaining.

Specificity: This antibody is specific to a 55 kDa protein known as interleukin 2-receptor (IL-2R alpha). IL-2R alpha is over expressed on the surface of activated T cell, HTLV-1, or HTLV-2 positive T cell lines and is moderately expressed on activated B cells, NK-cells, and macrophages.

Positive Control: Tonsil

Cellular Localization: Cell membrane

Storage: Store at 2-8°C. Do not use beyond the expiration date stated on the label.

Laboratory Reagent For Research Use Only
