Rabbit anti-Progesterone Receptor Pre-Diluted Monoclonal Antibody

CLSG90512

Lot:

Clone: BV7

Immunogen: A synthetic cyclic peptide from the antigen's c-terminus.

Isotype: IgG

Format: 6 ml. This antibody is supplied in a ready-to-use format.

Specificity: The progesterone receptor is an intracellular steroid receptor that specifically binds progesterone. Expressed by a single gene (chromosome 11q22), it has two main forms, A and B, that differ in their molecular weight. It has been proposed that expression of PR determination indicates a responsive estrogen receptor (ER) pathway.

Positive Control: Breast carcinoma

Cellular Localization: Nuclear

Storage: Store at 2-8°C. Do not use beyond the expiration date stated on the label.
