## Anti-Spike (SARS-CoV-2/South Africa Variant) Antibody (Rabbit Serum)

CATALOG NUMBER: SCV2-SA-255, 100 µl

### Introduction

The novel coronavirus (SARS-CoV-2), previously called 2019-nCoV, is a newly identified coronavirus causing the ongoing outbreak of atypical pneumonia in Wuhan China from late 2019.

The genome of SARS-CoV-2 has 89% nucleotide identity with bat SARS-like-CoVZXC21 and 82% with that of human SARS-CoV. The phylogenetic trees of their orf1a/b, Spike, Envelope, Membrane and Nucleoprotein also clustered closely with those of the bat, civet and human SARS coronaviruses. However, the external subdomain of Spike's receptor binding domain (RBD) of SARS-CoV-2 shares only 40% amino acid identity with other SARS-related coronaviruses.

### Applications

Western blot (1:500-1:2000), ELISA, Neutralization Assay, and other applications

### Description

Rabbit polyclonal anti-spike (SARS-CoV-2 South Africa variant) antibody, rabbit serum.

### Immunogen

Full length spike protein of SARS-CoV-2 South Africa variant (GISAID No. EPI\_ISL\_736980)

### Specificity

Reacts with spike protein of all SARS-CoV-2 variants tested. Cross-reaction to spike proteins from other coronavirus not tested.

### Storage

Store at -20 °C; Stable for 6-months from the date of shipment when kept at 4 °C. Non-hazardous.

### Size

100 µl rabbit serum
