## beta-Actin, (cytoplasmic 1) (NT). Rabbit Antigen Immunoaffinity Purified Polyclonal

### BACKGROUND

Actins are highly conserved proteins that are involved in cell motility, structure and integrity, processes that are crucial for tissue development and the development of organism. The actin cytoskeleton is one of the principal drivers of cell motility and is capable of responding to complex signaling cascades. Recent evidence suggests that it may play key roles in regulating apoptosis and aging. Beta actin is one of six different actin isoforms which have been identified. Like GAPDH, b-actin is constitutively expressed at high levels in almost all tissues and cell lines making it ideal for use as a loading control marker in immunoblots.

### ORDERING INFORMATION

#### CATALOG NUMBER

X2742P

#### SIZE

100 µg

#### FORM

Affinity Purified

#### HOST/CLONE

Rabbit

#### FORMULATION

Provided as solution in phosphate buffered saline with 0.08% sodium azide

#### CONCENTRATION

See vial for concentration

#### ISOTYPE

Ig

#### APPLICATIONS

Western blot, Immunohistochemistry

#### SPECIES REACTIVITY

Human

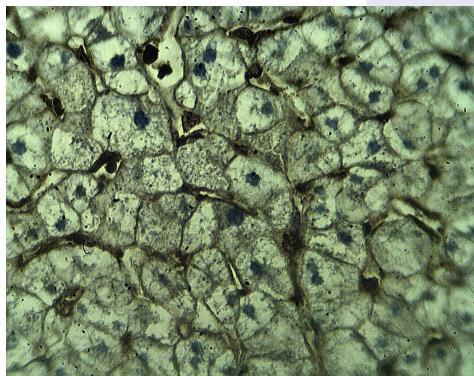

#### ACCESSION NUMBER

Human P60709

### IMMUNOGEN

Synthetic peptide derived from the N-terminal of the beta-actin protein.

Immunohistochemistry image using beta-Actin (NT) antibody (Cat. No. X2742P) on normal human liver tissue sections at 10 µg/ml.

**POSITIVE CONTROL/TISSUE EXPRESSION**

Human liver tissue

**COMMENTS**

Antibody can be used for Western blotting (1-5 µg/ml) and immunohistochemistry on paraffin-embedded tissues (10 µg/ml). Optimal concentration should be evaluated by serial dilutions.

**PURIFICATION**

Antigen Immunoaffinity Purification

**SHIP CONDITIONS**

Ship at ambient temperature, freeze upon arrival

**STORAGE CUSTOMER**

Product should be stored at -20°C. Aliquot to avoid freeze/thaw cycles

**STABILITY**

Products are stable for one year from purchase when stored properly
