Donkey anti Chicken IgY Fc, conjugated with Agarose

[exalpha.com/products/donkey-anti-chicken-igy-fc-conjugated-with-agarose/DAIgYFc-AGA-1](https://www.exalpha.com/products/donkey-anti-chicken-igy-fc-conjugated-with-agarose/DAIgYFc-AGA-1)

Catalog number: **DAIgYFc-AGA-1**

Product Type	Secondary antibodies
--------------	----------------------

Units	1 ml settled gel
-------	------------------

Host	Donkey
------	--------

Source

A donkey was immunized with purified chicken IgY. Anti-IgY Fc was isolated from immune sera using affinity chromatography and conjugated to N- hydroxysuccinimide (NHS)-activated agarose beads. Beads were washed extensively after the blocking of the residual NHS sites.

Product

Gel; 1.0 ml bed volume

Product Form: Immunoprecipitation Gel

Formulation: Phosphate buffered saline, pH 7.2 with 0.075% sodium azide

Purification Method: Egg-yolk derived IgY Affinity Purified

Concentration: N/A

Applications

The specific activity of the anti-IgY-agarose was determined by applying 2.7 mg IgY in 24 ml PBS (0.1 mg/ml) to 1.0 ml bed volume of agarose. Two ml aliquots were collected. The total amount of IgY that bound to the column was calculated. For this lot, 1.3 mg IgY bound per ml agarose.

Storage

Product should be stored at 4-8°C. DO NOT FREEZE

Caution

This product is intended FOR RESEARCH USE ONLY, and FOR TESTS IN VITRO, not for use in diagnostic or therapeutic procedures involving humans or animals. It may contain hazardous ingredients. Please refer to the Safety Data Sheets (SDS) for additional

information and proper handling procedures. Dispose product remainders according to local regulations. This datasheet is as accurate as reasonably achievable, but Exalpha Biologicals accepts no liability for any inaccuracies or omissions in this information.
