Normal Turkey IgY (egg-derived)

[exalpa.com/products/normal-turkey-igy-egg-derived-2/TIgY-100](https://www.exalpa.com/products/normal-turkey-igy-egg-derived-2/TIgY-100)

Catalog number: **TIgY-100**

| | |
|--------------|---------------------------|
| Product Type | Control antibodies |
| Units | 100 mg |
| Host | Turkey |
| Application | ELISA Western Blotting |

Source

IgY was purified from the egg yolks of unimmunized turkeys.

Product

Liquid turkey IgY fraction (opaque, light yellow in color).

Formulation: Phosphate buffered saline, pH 7.2 with 0.075% sodium azide

Purification Method: Egg yolk-derived purified IgY (non affinity purified)

Concentration: See vial for concentration.

Applications

Optimal working dilutions should be determined for your particular assay conditions.

Storage

The antibody may be stored at +4°C. For prolonged storage prepare appropriate aliquots and store at -20°C. Repeated thawing and freezing should be avoided. Working dilutions should be stored at +4°C, not refrozen, and preferably used the same day. An aliquot should be thawed slowly at ambient temperature and centrifuged to remove precipitate. This may result in a thin lipid layer floating on top and/or a visible precipitate. Removal of either will not affect the performance or the concentration of the product.

Shipping Conditions: The antibody is shipped at ambient temperature.

Caution

This product is intended FOR RESEARCH USE ONLY, and FOR TESTS IN VITRO, not for use in diagnostic or therapeutic procedures involving humans or animals. It may contain hazardous ingredients. Please refer to the Safety Data Sheets (SDS) for additional

information and proper handling procedures. Dispose product remainders according to local regulations. This datasheet is as accurate as reasonably achievable, but Exalpha Biologicals accepts no liability for any inaccuracies or omissions in this information.
