Mono AEC/Plus

Cat No. GTX03600

Application	IHC-P
--------------------	-------

Package	30 ml
----------------	-------

PRODUCT

Summary

Mono AEC/Plus is a single, highly stable, AEC chromogen/substrate liquid solution. When used in conjunction with immunoperoxidase detection systems, AEC produces a red colored end product, yielding strong contrast when combined with a blue hematoxylin counterstain. AEC has been well accepted among histotechnologists because it is less chemically hazardous than DAB. Specimens stained using Mono AEC/Plus cannot be dehydrated in ethanol and must be mounted in an aqueous-based mounting medium such as CC/Mount (GTX03598).

PROPERTIES

Form	Liquid
-------------	--------

Storage	Store at 4°C. Protect from light.
----------------	-----------------------------------

Conjugation	Unconjugated
--------------------	--------------

Note	For laboratory use only. Not for any clinical, therapeutic, or diagnostic use in humans or animals. Not for animal or human consumption.
-------------	--
