Uridine triphosphate-d₁₃ dilithium

Cat. No.:	HY-107372S3
Molecular Formula:	C ₉ D ₁₃ Li ₂ N ₂ O ₁₅ P ₃
Molecular Weight:	509.09
Target:	Isotope-Labeled Compounds; Endogenous Metabolite; DNA/RNA Synthesis
Pathway:	Others; Metabolic Enzyme/Protease; Cell Cycle/DNA Damage
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	Uridine triphosphate-d ₁₃ (UTP-d ₁₃ dilithium; Uridine 5'-triphosphate-d ₁₃) dilithium is deuterium labeled Uridine triphosphate (HY-107372). Uridine triphosphate (UTP; Uridine 5'-triphosphate) is a nucleotide that regulates the functions of the pancreas in endocrine and exocrine secretion, proliferation, channels, transporters, and intracellular signaling under normal and disease states.
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
