cis-Vaccenic acid-d₁₃

Cat. No.:	HY-113427AS
Molecular Formula:	C ₁₈ H ₂₁ D ₁₃ O ₂
Molecular Weight:	295.54
Target:	Antibiotic
Pathway:	Anti-infection
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	cis-Vaccenic acid-d ₁₃ is the deuterium labeled cis-Vaccenic acid. cis-Vaccenic acid, the antiviral extract from <i>Rhodopseudomonas capsulate</i> and the predominant active component of <i>Rhodopseudomonas capsulate</i> [1], acts a potential fetal hemoglobin inducer[2].
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
