BIOLOGICAL ACTIVITY

Description	MS7972 is a small molecule that blocks human p53 and CREB binding protein association. MS7972 can almost completely block this BRD interaction at 50 μM ^[1] .
In Vitro	Addition of MS7972 to the CBP BRD results in emission at 445 nm and quenching of the CBP BRD due to resonance energy transfer ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
