## Naphthol AS-D chloroacetate 98% (TLC)

|                    |                                                                                           |
|--------------------|-------------------------------------------------------------------------------------------|
| Cat. No.:          | HY-131474                                                                                 |
| CAS No.:           | 35245-26-2                                                                                |
| Molecular Formula: | C <sub>20</sub> H <sub>16</sub> ClNO <sub>3</sub>                                         |
| Molecular Weight:  | 353.8                                                                                     |
| Target:            | Biochemical Assay Reagents                                                                |
| Pathway:           | Others                                                                                    |
| Storage:           | Please store the product under the recommended conditions in the Certificate of Analysis. |

### BIOLOGICAL ACTIVITY

#### Description

Naphthol AS-D chloroacetate, 98% (TLC) (3-Hydroxy-2-naphthoic-o-toluidide chloroacetate, 98% (TLC)) is a substrate for esterase histochemical localization.

**Caution: Product has not been fully validated for medical applications. For research use only.**
