Mono(3-carboxypropyl) phthalate-d₄

Cat. No.:	HY-133673S
CAS No.:	1346600-69-8
Molecular Formula:	C ₁₂ H ₈ D ₄ O ₆
Molecular Weight:	256.24
Target:	Isotope-Labeled Compounds; Drug Metabolite
Pathway:	Others; Metabolic Enzyme/Protease
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	Mono(3-carboxypropyl) phthalate-d ₄ (MCPD-d ₄) is a deuterium labeled Mono(3-carboxypropyl) phthalate (HY-133673). Mono(3-carboxypropyl) phthalate (MCPD) is a metabolite of Di-n-octyl phthalate. Di-n-octyl phthalate (DnOP) is a plasticizer used in polyvinyl chloride plastics, cellulose esters, and polystyrene resins ^{[1][2]} .
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
