Caspofungin-d₄ diacetate

Cat. No.:	HY-17006S
Molecular Formula:	C ₅₆ H ₉₂ D ₄ N ₁₀ O ₁₉
Molecular Weight:	1217.44
Target:	Fungal; Bacterial; Antibiotic
Pathway:	Anti-infection
Storage:	-20°C, protect from light, stored under nitrogen * In solvent : -80°C, 6 months; -20°C, 1 month (protect from light, stored under nitrogen)

BIOLOGICAL ACTIVITY

Description	Caspofungin-d ₄ (acetate) is the deuterium labeled Caspofungin diacetate[1]. Caspofungin (MK-0991) diacetate is a potent antifungal agent. Caspofungin diacetate inhibits the synthesis of the fungal cell wall component β-(1,3)-D-glucan[2][3].
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
