(S)-2-Amino-3,3-dimethylbutanoic acid-d₆

Cat. No.:	HY-59140S2
Molecular Formula:	C ₈ H ₁₁ D ₆ NO ₂
Molecular Weight:	165.26
Target:	Amino Acid Derivatives; Isotope-Labeled Compounds
Pathway:	Others
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	(S)-2-Amino-3,3-dimethylbutanoic acid-d ₆ is a deuterated labeled (S)-2-Amino-3,3-dimethylbutanoic acid ^[1] . (S)-2-amino-3,3-dimethylbutanoic acid is a leucine derivative ^[2] .
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs^[1]. Amino acids and amino acid derivatives have been commercially used as ergogenic supplements. They influence the secretion of anabolic hormones, supply of fuel during exercise, mental performance during stress related tasks and prevent exercise induced muscle damage. They are recognized to be beneficial as ergogenic dietary substances^[2]. MCE has not independently confirmed the accuracy of these methods. They are for reference only.
