Ethyl 3-oxopentanoate

Cat. No.:	HY-78211		
CAS No.:	4949-44-4		
Molecular Formula:	C ₇ H ₁₂ O ₃		
Molecular Weight:	144.17		
Target:	Biochemical Assay Reagents		
Pathway:	Others		
Storage:	Pure form	-20°C	3 years
		4°C	2 years
	In solvent	-80°C	6 months
		-20°C	1 month

BIOLOGICAL ACTIVITY

Description	Ethyl 3-oxopentanoate is an organic ester compound commonly used as a reactant or solvent in organic synthesis. It can be used as an important raw material for the preparation of pharmaceuticals, food flavors, spices and other products. In addition, because of its stability and reactivity in certain chemical reactions, it is also widely used in some industrial productions. Although Ethyl 3-oxopentanoate has no direct application in the medical field, it still plays an important role in chemical research and industry.
In Vitro	Ethyl propanoylacetate is a biochemical reagent that can be used as a biological material or organic compound for life science related research. MCE has not independently confirmed the accuracy of these methods. They are for reference only.

Caution: Product has not been fully validated for medical applications. For research use only.
