

# SZABO SCANDIC

Part of Europa Biosite

## Produktinformation

Forschungsprodukte & Biochemikalien

Zellkultur & Verbrauchsmaterial

Diagnostik & molekulare Diagnostik

Laborgeräte & Service

Weitere Information auf den folgenden Seiten!  
See the following pages for more information!

### Lieferung & Zahlungsart

siehe unsere [Liefer- und Versandbedingungen](#)

### Zuschläge

- Mindermengenzuschlag
- Trockeneiszuschlag
- Gefahrgutzuschlag
- Expressversand

### SZABO-SCANDIC HandelsgmbH

Quellenstraße 110, A-1100 Wien

## 4-Phenoxybenzoic acid

|                    |                                                |       |          |
|--------------------|------------------------------------------------|-------|----------|
| Cat. No.:          | HY-78854                                       |       |          |
| CAS No.:           | 2215-77-2                                      |       |          |
| Molecular Formula: | C <sub>13</sub> H <sub>10</sub> O <sub>3</sub> |       |          |
| Molecular Weight:  | 214.22                                         |       |          |
| Target:            | Biochemical Assay Reagents                     |       |          |
| Pathway:           | Others                                         |       |          |
| Storage:           | Powder                                         | -20°C | 3 years  |
|                    |                                                | 4°C   | 2 years  |
|                    | In solvent                                     | -80°C | 6 months |
|                    |                                                | -20°C | 1 month  |

### BIOLOGICAL ACTIVITY

|             |                                                                                                                                                                                                                                                                                                                                         |
|-------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Description | 4-Phenoxybenzoic acid is a biochemical reagent that can be used as a biological material or organic compound for life science related research.                                                                                                                                                                                         |
| In Vitro    | 4-Phenoxybenzoic acid can block DNA binding of the human papillomavirus (HPV) E2 protein. It is employed as an intermediate of Sitafloracin, which is a fluoroquinolone antibiotic that shows promise in the treatment of Buruli ulcer. MCE has not independently confirmed the accuracy of these methods. They are for reference only. |

**Caution: Product has not been fully validated for medical applications. For research use only.**
